

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version	Revision Date.:	SDS Number:	Date of last issue: 05.09.2025
6.3	13.03.2026	800010045615	Print Date. 23.03.2026

---

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

Trade name	:	Premium Unleaded Gasoline E10
Product code	:	002D7203
Unique Formula Identifier	:	UMM3-D08A-Q004-XG56

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Substance/Mixture	:	Fuel for use in suitably designed motor vehicles. Please refer to section 16 and/or the annexes for the registered uses under REACH.
------------------------------	---	---

Uses advised against	:	This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the supplier., This product is not to be used as a solvent or cleaning agent; for lighting or brightening fires; as a skin cleanser., This product is designed only to suit automotive applications and no provision is made for the requirements of aviation applications.
----------------------	---	--

#### 1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier	:	<b>Shell UK Oil Products Limited</b> Shell Centre London SE1 7NA United Kingdom
Telephone	:	(+44) 08007318888
Telefax	:	
Contact for Safety Data Sheet	:	If you have any enquiries about the content of this SDS please email <a href="mailto:fuelSDS@shell.com">fuelSDS@shell.com</a>

#### 1.4 Emergency telephone number

: +44 (0) 20 7934 7778 (This telephone number is available 24 hours per day, 7 days per week)

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
Print Date. 23.03.2026

### SECTION 2: Hazards identification

#### 2.1 Classification of the substance or mixture

##### Classification (REGULATION (EC) No 1272/2008)

Flammable liquids, Category 1	H224: Extremely flammable liquid and vapour.
Skin irritation, Category 2	H315: Causes skin irritation.
Carcinogenicity, Category 1B	H350: May cause cancer.
Germ cell mutagenicity, Category 1B	H340: May cause genetic defects.
Aspiration hazard, Category 1	H304: May be fatal if swallowed and enters airways.
Specific target organ toxicity - single exposure, Category 3, Inhalation, Narcotic effects	H336: May cause drowsiness or dizziness.
Reproductive toxicity, Category 2	H361fd: Suspected of damaging fertility. Suspected of damaging the unborn child.
Long-term (chronic) aquatic hazard, Category 2	H411: Toxic to aquatic life with long lasting effects.

#### 2.2 Label elements

##### Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms :

Signal word : Danger

Hazard statements :

PHYSICAL HAZARDS:  
H224 Extremely flammable liquid and vapour.

HEALTH HAZARDS:  
H315 Causes skin irritation.  
H340 May cause genetic defects.  
H350 May cause cancer.  
H304 May be fatal if swallowed and enters airways.  
H336 May cause drowsiness or dizziness.  
H361fd Suspected of damaging fertility. Suspected of damaging the unborn child.

ENVIRONMENTAL HAZARDS:  
H411 Toxic to aquatic life with long lasting effects.

Precautionary statements : **Prevention:**  
P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.  
P273 Avoid release to the environment.  
P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version 6.3	Revision Date.: 13.03.2026	SDS Number: 800010045615	Date of last issue: 05.09.2025 Print Date. 23.03.2026
----------------	-------------------------------	-----------------------------	--

### Response:

P301 + P310 IF SWALLOWED: Immediately call a POISON CENTER/ doctor.

P331 Do NOT induce vomiting.

### Storage:

P403 + P233 Store in a well-ventilated place. Keep container tightly closed.

### Disposal:

P501 Dispose of contents/ container to an approved waste disposal plant.

### 2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Liquid evaporates quickly and can ignite leading to a flash fire, or an explosion in a confined space.

A component or components of this material may cause cancer.

This product contains benzene which may cause leukaemia (AML - acute myelogenous leukaemia).

This material is a static accumulator.

Even with proper grounding and bonding, this material can still accumulate an electrostatic charge.

If sufficient charge is allowed to accumulate, electrostatic discharge and ignition of flammable air-vapour mixtures can occur.

Ether oxygenates are significantly more water soluble and less biodegradable than benzene, toluene, ethyl benzene and xylenes (BTEX)

## SECTION 3: Composition/information on ingredients

### 3.2 Mixtures

Chemical nature : Complex mixture of hydrocarbons consisting of paraffins, cycloparaffins, aromatic and olefinic hydrocarbons with carbon numbers predominantly in the C4 to C12 range.  
Contains oxygenated hydrocarbons, including ethanol or other alcohols.  
Contains oxygenated hydrocarbons which may include methyl tertiary butyl ether (MTBE) and other ethers.

### SECTION 4: First aid measures

#### 4.1 Description of first aid measures

- General advice : Not expected to be a health hazard when used under normal conditions.
- Protection of first-aiders : When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.
- If inhaled : Remove to fresh air. If rapid recovery does not occur, transport to nearest medical facility for additional treatment.
- In case of skin contact : Remove contaminated clothing. Immediately flush skin with large amounts of water for at least 15 minutes, and follow by washing with soap and water if available. If redness, swelling, pain and/or blisters occur, transport to the nearest medical facility for additional treatment.  
When using high pressure equipment, injection of product under the skin can occur. If high pressure injuries occur, the casualty should be sent immediately to a hospital. Do not wait for symptoms to develop.  
Obtain medical attention even in the absence of apparent wounds.
- In case of eye contact : Flush eye with copious quantities of water.  
Remove contact lenses, if present and easy to do. Continue rinsing.  
If persistent irritation occurs, obtain medical attention.
- If swallowed : Call emergency number for your location / facility.  
If swallowed, do not induce vomiting: transport to nearest

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version  
6.3

Revision Date.:  
13.03.2026

SDS Number:  
800010045615

Date of last issue: 05.09.2025  
Print Date. 23.03.2026

---

medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration. If any of the following delayed signs and symptoms appear within the next 6 hours, transport to the nearest medical facility: fever greater than 101° F (38.3°C), shortness of breath, chest congestion or continued coughing or wheezing.

### 4.2 Most important symptoms and effects, both acute and delayed

Symptoms : Breathing of high vapour concentrations may cause central nervous system (CNS) depression resulting in dizziness, light-headedness, headache and nausea.  
The onset of respiratory symptoms may be delayed for several hours after exposure.  
Skin irritation signs and symptoms may include a burning sensation, redness, or swelling.  
Local necrosis is evidenced by delayed onset of pain and tissue damage a few hours following injection.  
Eye irritation signs and symptoms may include a burning sensation and a temporary redness of the eye.  
If material enters lungs, signs and symptoms may include coughing, choking, wheezing, difficulty in breathing, chest congestion, shortness of breath, and/or fever.  
If any of the following delayed signs and symptoms appear within the next 6 hours, transport to the nearest medical facility: fever greater than 101° F (38.3°C), shortness of breath, chest congestion or continued coughing or wheezing.

### 4.3 Indication of any immediate medical attention and special treatment needed

Treatment : IMMEDIATE TREATMENT IS EXTREMELY IMPORTANT!  
Treat symptomatically.  
Call a doctor or poison control center for guidance.  
High pressure injection injuries require prompt surgical intervention and possibly steroid therapy, to minimise tissue damage and loss of function.  
Because entry wounds are small and do not reflect the seriousness of the underlying damage, surgical exploration to determine the extent of involvement may be necessary. Local anaesthetics or hot soaks should be avoided because they can contribute to swelling, vasospasm and ischaemia. Prompt surgical decompression, debridement and evacuation of foreign material should be performed under general anaesthetics, and wide exploration is essential.  
Potential for chemical pneumonitis.  
Do not induce vomiting.

## Premium Unleaded Gasoline E10

Version 6.3	Revision Date.: 13.03.2026	SDS Number: 800010045615	Date of last issue: 05.09.2025 Print Date. 23.03.2026
----------------	-------------------------------	-----------------------------	--

---

### SECTION 5: Firefighting measures

#### 5.1 Extinguishing media

- Suitable extinguishing media : Alcohol-resistant foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.
- Unsuitable extinguishing media : Do not use direct water jets on the burning product as they could cause a steam explosion and spread of the fire. Simultaneous use of foam and water on the same surface is to be avoided as water destroys the foam.

#### 5.2 Special hazards arising from the substance or mixture

- Specific hazards during fire-fighting : Hazardous combustion products may include:  
A complex mixture of airborne solid and liquid particulates and gases (smoke).  
Carbon monoxide may be evolved if incomplete combustion occurs.  
Unidentified organic and inorganic compounds.  
The vapour is heavier than air, spreads along the ground and distant ignition is possible.  
Will float and can be reignited on surface water.

#### 5.3 Advice for firefighters

- Special protective equipment for firefighters : Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).
- Further information : Keep adjacent containers cool by spraying with water. If possible remove containers from the danger zone. If the fire cannot be extinguished the only course of action is to evacuate immediately. Contain residual material at affected sites to prevent material from entering drains (sewers), ditches, and waterways.
- Prevent fire extinguishing water from contaminating surface water or the ground water system.

---

### SECTION 6: Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

- Personal precautions : 6.1.1 For non emergency personnel:

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version 6.3	Revision Date.: 13.03.2026	SDS Number: 800010045615	Date of last issue: 05.09.2025 Print Date. 23.03.2026
----------------	-------------------------------	-----------------------------	--

---

Do not breathe fumes, vapour.  
Do not operate electrical equipment.  
6.1.2 For emergency responders:  
Shut off leaks, if possible without personal risks.  
Evacuate all personnel.  
Vapour can travel for considerable distances both above and below the ground surface. Underground services (drains, pipelines, cable ducts) can provide preferential flow paths. Remove all possible sources of ignition in the surrounding area.  
Attempt to disperse vapour or to direct its flow to a safe location for example using fog sprays.

### 6.2 Environmental precautions

Environmental precautions : Take measures to minimise the effects on groundwater. Contain residual material at affected sites to prevent material from entering drains (sewers), ditches, and waterways. Prevent from spreading or entering into drains, ditches or rivers by using sand, earth, or other appropriate barriers.

Do not allow contact with soil, surface or ground water.

### 6.3 Methods and material for containment and cleaning up

Methods for cleaning up : Take precautionary measures against static discharges. For large liquid spills (> 1 drum), transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely. For small liquid spills (< 1 drum), transfer by mechanical means to a labeled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

### 6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet., Notify authorities if any exposure to the general public or the environment occurs or is likely to occur., For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet., Local authorities should be advised if significant spillages cannot be contained., Maritime spillages should be dealt with using a Shipboard Oil Pollution Emergency Plan (SOPEP), as required by MARPOL Annex 1 Regulation 26.

To the extent that this product, including its chemical components (e.g. Methyl tertiary butyl ether) may impact surface or groundwater, appropriate assessment and remediation (if necessary) should be implemented.

## Premium Unleaded Gasoline E10

Version 6.3	Revision Date.: 13.03.2026	SDS Number: 800010045615	Date of last issue: 05.09.2025 Print Date. 23.03.2026
----------------	-------------------------------	-----------------------------	--

---

### SECTION 7: Handling and storage

#### 7.1 Precautions for safe handling

- Technical measures : Avoid breathing of or direct contact with material. Only use in well ventilated areas. Wash thoroughly after handling. For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet.  
Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.  
Air-dry contaminated clothing in a well-ventilated area before laundering.  
Prevent spillages.  
Turn off all battery operated portable electronic devices (examples include: cellular phones, pagers and CD players) before operating gasoline pump.  
Contaminated leather articles including shoes cannot be decontaminated and should be destroyed to prevent reuse.  
Do not use as a cleaning solvent or other non-motor fuel uses.  
Ensure that all local regulations regarding handling and storage facilities are followed.  
Vehicle fueling and vehicle workshop areas - Avoid inhalation of vapours and contact with skin, when filling or emptying a vehicle.
- Advice on safe handling : Ensure that all local regulations regarding handling and storage facilities are followed.  
When using do not eat or drink.  
Extinguish any naked flames. Do not smoke. Remove ignition sources. Avoid sparks.  
Never siphon by mouth.  
The vapour is heavier than air, spreads along the ground and distant ignition is possible.  
Avoid exposure. Obtain special instructions before use.  
Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols.  
Properly dispose of any contaminated rags or cleaning materials in order to prevent fires.
- Product Transfer : Wait 2 minutes after tank filling (for tanks such as those on road tanker vehicles) before opening hatches or manholes. Wait 30 minutes after tank filling ( for large storage tanks) before opening hatches or manholes. Even with proper grounding and bonding, this material can still accumulate an electrostatic charge. If sufficient charge is allowed to accumulate, electrostatic discharge and ignition of flammable air-vapour mixtures can occur. Be aware of handling operations that may give rise to additional hazards that result from the accumulation of static charges. These include but are not

# SAFETY DATA SHEET.

Date of last issue: 05.09.2025  
Print Date. 23.03.2026

---

limited to pumping (especially turbulent flow), mixing, filtering, splash filling, cleaning and filling of tanks and containers, sampling, switch loading, gauging, vacuum truck operations, and mechanical movements. These activities may lead to static discharge e.g. spark formation. Restrict line velocity during pumping in order to avoid generation of electrostatic discharge ( $\leq 1$  m/s until fill pipe submerged to twice its diameter, then  $\leq 7$  m/s). Avoid splash filling. Do NOT use compressed air for filling, discharging, or handling operations.

Hygiene measures : Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping. Define procedures for safe handling and maintenance of controls. Educate and train workers in the hazards and control measures relevant to normal activities associated with this product. Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation. Drain down system prior to equipment break-in or maintenance. Retain drain downs in sealed storage pending disposal or subsequent recycle. Do not ingest. If swallowed, then seek immediate medical assistance.

Exposure to this product should be reduced as low as reasonably practicable. Reference should be made to the Health and Safety Executive's publication "COSHH Essentials".

### 7.2 Conditions for safe storage, including any incompatibilities

Further information on storage stability : Drum and small container storage:  
Keep containers closed when not in use.  
Drums should be stacked to a maximum of 3 high.  
Use properly labeled and closable containers.  
Packaged product must be kept tightly closed and stored in a diked (bunded) well-ventilated area, away from, ignition sources and other sources of heat.  
Take suitable precautions when opening sealed containers, as pressure can build up during storage.  
Tank storage:  
Tanks must be specifically designed for use with this product. Bulk storage tanks should be diked (bunded).  
Locate tanks away from heat and other sources of ignition.  
Cleaning, inspection and maintenance of storage tanks is a specialist operation, which requires the implementation of strict procedures and precautions.  
Keep in a cool place.  
Electrostatic charges will be generated during pumping.  
Electrostatic discharge may cause fire. Ensure electrical continuity by bonding and grounding (earthing) all equipment to reduce the risk.

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
Print Date. 23.03.2026

- The vapours in the head space of the storage vessel may lie in the flammable/explosive range and hence may be flammable.
- Refer to section 15 for any additional specific legislation covering the packaging and storage of this product.
- The storage of this product may be subject to the Control of Pollution (Oil Storage) (England) Regulations. Further guidance may be obtained from the local environmental agency office.
- Packaging material : Suitable material: For containers, or container linings use mild steel, stainless steel., Aluminium may also be used for applications where it does not present an unnecessary fire hazard., Examples of suitable materials are: high density polyethylene (HDPE), polypropylene (PP), and Viton (FKM), which have been specifically tested for compatibility with this product., For container linings, use amine-adduct cured epoxy paint., For seals and gaskets use: graphite, PTFE, Viton A, Viton B.
- Unsuitable material: Some synthetic materials may be unsuitable for containers or container linings depending on the material specification and intended use. Examples of materials to avoid are: natural rubber (NR), nitrile rubber (NBR), ethylene propylene rubber (EPDM), polymethyl methacrylate (PMMA), polystyrene, polyvinyl chloride (PVC), polyisobutylene., However, some may be suitable for glove materials.
- Container Advice : Containers, even those that have been emptied, can contain explosive vapours. Do not cut, drill, grind, weld or perform similar operations on or near containers. Gasoline containers must not be used for storage of other products.

### 7.3 Specific end use(s)

- Specific use(s) : Please refer to section 16 and/or the annexes for the registered uses under REACH.

See additional references that provide safe handling practices for liquids that are determined to be static accumulators: American Petroleum Institute 2003 (Protection Against Ignitions Arising out of Static, Lightning and Stray Currents) or National Fire Protection Agency 77 (Recommended Practices on Static Electricity).

			fects	
Methanol	Workers	Dermal	Long-term systemic effects	40 mg/kg/day
Methanol	Workers	Inhalation	Long-term systemic effects	260 mg/kg
Methanol	Consumers	Inhalation	Acute systemic effects	50 mg/kg
Methanol	Consumers	Dermal	Long-term systemic effects	8 mg/kg/day
Methanol	Consumers	Inhalation	Long-term systemic effects	50 mg/kg
Methanol	Consumers	Oral	Long-term systemic effects	8 mg/kg/day
Naphthalene	Consumers	Oral	Long-term systemic effects	4.23 mg/kg
Ethylbenzene	Workers	Inhalation	Acute local effects	293 mg/m3
Ethylbenzene	Workers	Inhalation	Long-term systemic effects	77 mg/m3
Ethylbenzene	Workers	Dermal	Long-term systemic effects	180 mg/kg bw/day
Ethylbenzene	Consumers	Inhalation	Long-term systemic effects	15 mg/m3
Ethylbenzene	Consumers	Oral	Long-term systemic effects	1.6 mg/kg bw/day
Benzene	Workers	Inhalation	Long-term systemic effects	0.8 mg/m3/ 8h

### Predicted No Effect Concentration (PNEC) according to Regulation (EC) No. 1907/2006:

Substance name	Environmental Compartment	Value
Remarks:	Substance is a hydrocarbon with a complex, unknown or variable composition. Conventional methods of deriving PNECs are not appropriate and it is not possible to identify a single representative PNEC for such substances.	

## 8.2 Exposure controls

### Engineering measures

Read in conjunction with the Exposure Scenario for your specific use contained in the Annex. The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Use sealed systems as far as possible.

Firewater monitors and deluge systems are recommended.

Adequate explosion-proof ventilation to control airborne concentrations below the exposure guidelines/limits.

Local exhaust ventilation is recommended.

Eye washes and showers for emergency use.

Consider technical advances and process upgrades (including automation) for the elimination of releases. Minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to

# SAFETY DATA SHEET.

## Premium Unleaded Gasoline E10

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
Print Date. 23.03.2026

---

breaking containment. Clean/flush equipment, where possible, prior to maintenance. Where there is potential for exposure: restrict access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when there is potential for inhalation; clear up spills immediately and dispose of wastes safely. Ensure safe systems of work or equivalent arrangements are in place to manage risks. Regularly inspect, test and maintain all control measures. Consider the need for risk based health surveillance.

Prevent unauthorised persons entering the zone.

### Personal protective equipment

Read in conjunction with the Exposure Scenario for your specific use contained in the Annex.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Eye protection : Wear goggles for use against liquids and gas.  
If a local risk assessment deems it so then chemical splash goggles may not be required and safety glasses may provide adequate eye protection.  
Approved to EU Standard EN166.

Hand protection

Remarks : Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Select gloves tested to a relevant standard (e.g. Europe EN374, US F739). When prolonged or frequent repeated contact occurs, Nitrile gloves may be suitable. (Breakthrough time of > 240 minutes.) For incidental contact/splash protection Neoprene, PVC gloves may be suitable.

## Premium Unleaded Gasoline E10

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
Print Date. 23.03.2026

---

Skin and body protection	:	Glove thickness should be typically greater than 0.35 mm depending on the glove make and model. Wear chemical resistant gloves/gauntlets and boots. Where risk of splashing, also wear an apron. Protective clothing approved to EU Standard EN14605.
Respiratory protection	:	If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Where air-filtering respirators are unsuitable (e.g. airborne concentrations are high, risk of oxygen deficiency, confined space) use appropriate positive pressure breathing apparatus. All respiratory protection equipment and use must be in accordance with local regulations. Select a filter suitable for combined particulate/organic gases and vapours [Type A/Type P boiling point > 65°C (149°F)] meeting EN14387 and EN143.
Thermal hazards	:	Not applicable

### 9.2 Other information

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
Print Date. 23.03.2026

---

Explosive properties	:	Classification Code: Not classified.
Oxidizing properties	:	Not applicable
Evaporation rate	:	Data not available
Conductivity	:	Low conductivity: < 100 pS/m, The conductivity of this material makes it a static accumulator., A liquid is typically considered nonconductive if its conductivity is below 100 pS/m and is considered semi-conductive if its conductivity is below 10,000 pS/m., Whether a liquid is nonconductive or semiconductive, the precautions are the same., A number of factors, for example liquid temperature, presence of contaminants, and anti-static additives can greatly influence the conductivity of a liquid

---

### SECTION 10: Stability and reactivity

#### 10.1 Reactivity

May oxidise in the presence of air.

#### 10.2 Chemical stability

Stable under normal conditions of use.

#### 10.3 Possibility of hazardous reactions

Hazardous reactions : No hazardous reaction is expected when handled and stored according to provisions

#### 10.4 Conditions to avoid

Conditions to avoid : Avoid heat, sparks, open flames and other ignition sources.  
  
In certain circumstances product can ignite due to static electricity.

#### 10.5 Incompatible materials

Materials to avoid : Strong oxidising agents.

#### 10.6 Hazardous decomposition products

Hazardous decomposition products are not expected to form during normal storage. Thermal decomposition is highly dependent on conditions. A complex mixture of airborne solids, liquids and gases including carbon monoxide, carbon dioxide, sulphur oxides and unidentified organic compounds will be evolved when this material undergoes combustion or thermal or oxidative degradation.

---

### SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Information on likely routes of exposure : Exposure may occur via inhalation, ingestion, skin absorption, skin or eye contact, and accidental ingestion.

### Acute toxicity

#### Product:

Acute oral toxicity : LD50 Oral (Rat): > 5,000 mg/kg  
Remarks: Low toxicity

Acute inhalation toxicity : LC50 (Rat): > 5 mg/l  
Exposure time: 4 h  
Remarks: Low toxicity

Acute dermal toxicity : LD 50 (Rabbit): > 2,000 mg/kg  
Remarks: Low toxicity

Acute toxicity (other routes of administration) : Remarks: Exposure may occur via inhalation, ingestion, skin absorption, skin or eye contact, and accidental ingestion.

### Components:

#### **Gasoline; Low boiling point naphtha -unspecified:**

Acute oral toxicity : LD 50 (Rat): > 5,000 mg/kg  
Remarks: Low toxicity

Acute inhalation toxicity : LC 50 (Rat): > 5 mg/l  
Exposure time: 4 h  
Remarks: Low toxicity

Remarks: Based on human experience, breathing of vapours or mists may cause a temporary burning sensation to nose, throat and lungs.

Acute dermal toxicity : LD 50 (Rabbit): > 2,000 mg/kg  
Remarks: Low toxicity

Acute toxicity (other routes of administration) : Remarks: Exposure may occur via inhalation, ingestion, skin absorption, skin or eye contact, and accidental ingestion.

#### **Ethyl tertiary butyl ether:**

Acute oral toxicity : LD50 Oral (Rat, male and female): > 2,000 mg/kg  
Method: Test(s) equivalent or similar to OECD Test Guideline 401  
Remarks: Based on available data, the classification criteria are not met.

Acute inhalation toxicity : LC 50 (Rat, male and female): > 5.88 mg/l  
Exposure time: 4 h  
Test atmosphere: vapour  
Method: Test(s) equivalent or similar to OECD Test Guideline 403  
Remarks: Based on available data, the classification criteria are not met.

Acute dermal toxicity : LD50 Dermal (Rabbit, male and female): > 2,000 mg/kg  
Method: Test(s) equivalent or similar to OECD Test Guideline 402  
Remarks: Based on available data, the classification criteria are not met.

### **tert-butyl methyl ether:**

Acute oral toxicity : LD 50 (Rat, male and female): Method: OECD Test Guideline 401  
Remarks: May be harmful if swallowed.

Acute inhalation toxicity : LC 50 (Rat, male and female): > 85 mg/l  
Exposure time: 4 h  
Test atmosphere: vapour  
Method: Test(s) equivalent or similar to OECD Test Guideline 403  
Remarks: Based on available data, the classification criteria are not met.

Acute dermal toxicity : LD 50 (Rat, male and female): > 2,000 mg/kg  
Method: OECD Test Guideline 402  
Remarks: Based on available data, the classification criteria are not met.

### **Ethanol:**

Acute oral toxicity : LD50 Oral (Rat, male and female): > 5,000 mg/kg  
Method: Test(s) equivalent or similar to OECD Test Guideline 401  
Remarks: Based on available data, the classification criteria are not met.

Acute inhalation toxicity : LC 50 (Rat, male and female): > 124.7 mg/l  
Exposure time: 4 h  
Test atmosphere: vapour  
Method: Test(s) equivalent or similar to OECD Test Guideline 403  
Remarks: Based on available data, the classification criteria are not met.

Acute dermal toxicity : Remarks: Based on available data, the classification criteria

are not met.

### **Methanol:**

- Acute oral toxicity : Acute toxicity estimate: 100 mg/kg bw  
Remarks: Expert judgement
- LD 50 (Rat):  $\geq$  1187 - 2769 mg/kg bw  
Method: Test(s) equivalent or similar to OECD Test Guideline 401  
Remarks: Toxic if swallowed.  
There is a marked difference in acute oral toxicity between animals and man, man being more susceptible than animals.  
The estimated fatal dose for man is 100 milliliters (1/2 cup).
- Acute inhalation toxicity : Acute toxicity estimate: 3 mg/l  
Exposure time: 4 h  
Test atmosphere: vapour  
Remarks: Expert judgement
- LC 50 (Cat): 43.7 mg/l  
Exposure time: 6 h  
Test atmosphere: vapour  
Method: Acceptable non-standard method.  
Remarks: Toxic if inhaled.
- Acute dermal toxicity : Acute toxicity estimate: 300 mg/kg bw  
Remarks: Expert judgement
- LD50 Dermal (Rabbit): 17100 mg/kg bw  
Remarks: Toxic in contact with skin.

### **Components:**

#### **Xylene, mixed isomers:**

- Acute oral toxicity : LD 50 (Rat, male and female): > 2,000 mg/kg  
Method: EC Directive 92/69/EEC B.1 Acute Toxicity (Oral)  
Remarks: Based on available data, the classification criteria are not met.
- Acute inhalation toxicity : LC 50 (Rat, male): 6350 ppm  
Exposure time: 4 h  
Test atmosphere: vapour  
Method: Test(s) equivalent or similar to Directive 67/548/EEC, Annex V, B.2.  
Remarks: Harmful if inhaled.
- Acute dermal toxicity : LD 50 (Rabbit, male): > 2,000 mg/kg  
Method: Literature data

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
Print Date. 23.03.2026

---

Test substance: m-xylene  
Remarks: Based on available data, the classification criteria are not met.  
Information given is based on data obtained from similar substances.

### **Toluene:**

Acute oral toxicity : LD 50 (Rat, male): > 5,000 mg/kg  
Method: Test(s) equivalent or similar to OECD Test Guideline 401  
Remarks: Based on available data, the classification criteria are not met.

Acute inhalation toxicity : LC 50 (Rat, male and female): > 20 mg/l  
Exposure time: 4 h  
Test atmosphere: vapour  
Method: Test(s) equivalent or similar to OECD Test Guideline 403  
Remarks: Based on available data, the classification criteria are not met.  
High concentrations may cause central nervous system depression resulting in headaches, dizziness and nausea.

Acute dermal toxicity : LD 50 (Rabbit, male): > 5,000 mg/kg  
Method: Literature data  
Remarks: Based on available data, the classification criteria are not met.

### **n-Hexane:**

Acute oral toxicity : LD50 (Rat, male and female): 16,000 mg/kg  
Method: OECD Test Guideline 401  
Remarks: Low toxicity

Acute inhalation toxicity : LC50 (Rat): > 17600 mg/m<sup>3</sup>  
Exposure time: 24 h  
Remarks: Low toxicity by inhalation.

Acute dermal toxicity : LD50 (Rabbit): > 5 mg/kg bw  
Method: OECD Test Guideline 402  
Remarks: Low toxicity

### **Ethylbenzene:**

Acute oral toxicity : LD50 (Rat): > 2000 - 5000 mg/kg  
Remarks: May be harmful if swallowed.

Acute inhalation toxicity : LC50: > 10 - 20 mg/l  
Remarks: Harmful if inhaled.

# SAFETY DATA SHEET.

## Premium Unleaded Gasoline E10

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
Print Date. 23.03.2026

---

Acute dermal toxicity : LD50 (Rabbit): > 5000 mg/kg  
Remarks: Low toxicity

### **Cyclohexane:**

Acute oral toxicity : LD50 Oral (Rat): > 5,000 mg/kg  
Assessment: The component/mixture is minimally toxic after single ingestion.  
Remarks: Based on available data, the classification criteria are not met.

Acute inhalation toxicity : LC 50 (Rat): > 20 mg/l  
Assessment: The component/mixture is minimally toxic after short term inhalation.  
Remarks: Based on available data, the classification criteria are not met.

Acute dermal toxicity : LD50 Dermal (Rabbit): > 2,000 mg/kg  
Assessment: The component/mixture is minimally toxic after single contact with skin.  
Remarks: Based on available data, the classification criteria are not met.

### **Cumene:**

Acute oral toxicity : LD50 (Rat): 2,000 - 5,000 mg/kg  
Method: Test(s) equivalent or similar to OECD Test Guideline 401  
Remarks: Based on available data, the classification criteria are not met.

Acute inhalation toxicity : LC50 (Rat, male): > 20 mg/l  
Exposure time: 1 h  
Method: Acceptable non-standard method.  
Remarks: Based on available data, the classification criteria are not met.

Acute dermal toxicity : LD50 (Rabbit, male and female): 2,000 - 5,000 mg/kg  
Method: Acceptable non-standard method.  
Remarks: Based on available data, the classification criteria are not met.

### **Benzene:**

Acute oral toxicity : LD 50 (Rat, male): > 2,000 mg/kg  
Method: Test(s) equivalent or similar to OECD Test Guideline 401  
Remarks: Based on available data, the classification criteria are not met.

Acute inhalation toxicity : LC 50 (Rat, female): > 20 mg/l  
Exposure time: 4 h  
Test atmosphere: vapour  
Method: Test(s) equivalent or similar to OECD Test Guideline 403  
Remarks: Based on available data, the classification criteria are not met.  
High concentrations may cause central nervous system depression resulting in headaches, dizziness and nausea; continued inhalation may result in unconsciousness and/or death.

Acute dermal toxicity : LD 50 (Rabbit): > 2,000 mg/kg  
Method: Test(s) equivalent or similar to OECD Test Guideline 402  
Remarks: Based on available data, the classification criteria are not met.

### Skin corrosion/irritation

#### Product:

Remarks : Irritating to skin.

#### Components:

##### **Gasoline; Low boiling point naphtha -unspecified:**

Remarks : Irritating to skin.

##### **Ethyl tertiary butyl ether:**

Species : Rabbit  
Method : Test(s) equivalent or similar to OECD Test Guideline 404  
Remarks : Slightly irritating.  
Insufficient to classify.

##### **tert-butyl methyl ether:**

Species : Rabbit  
Method : OECD Test Guideline 404  
Remarks : Irritating to skin.

##### **Ethanol:**

Species : Rabbit  
Method : Test(s) equivalent or similar to OECD Test Guideline 404  
Remarks : Based on data from similar materials  
Based on available data, the classification criteria are not met.

### **Methanol:**

Species : Rabbit  
Method : Acceptable non-standard method.  
Remarks : Based on available data, the classification criteria are not met.

### **Components:**

#### **Xylene, mixed isomers:**

Species : Rabbit  
Method : Literature data  
Remarks : Causes skin irritation.

#### **Toluene:**

Species : Rabbit  
Method : Test(s) equivalent or similar to OECD Test Guideline 404  
Remarks : Causes skin irritation.

#### **n-Hexane:**

Species : Rabbit  
Exposure time : 24 h  
Method : OECD Test Guideline 404  
Result : Skin irritation  
Remarks : Causes skin irritation.  
Repeated exposure may cause skin dryness or cracking.

#### **Ethylbenzene:**

Remarks : Causes skin irritation.

#### **Cyclohexane:**

Remarks : Causes skin irritation.

#### **Cumene:**

Species : Rabbit  
Method : Test(s) equivalent or similar to OECD Test Guideline 404  
Remarks : Slightly irritating to skin.  
Insufficient to classify.

### Serious eye damage/eye irritation

#### Product:

Remarks : Slightly irritating to the eye.  
Based on available data, the classification criteria are not met.

#### Components:

##### **Gasoline; Low boiling point naphtha -unspecified:**

Remarks : Slightly irritating to the eye.  
Based on available data, the classification criteria are not met.

##### **Ethyl tertiary butyl ether:**

Species : Rabbit  
Method : Test(s) equivalent or similar to OECD Test Guideline 405  
Remarks : Slightly irritating.  
Based on available data, the classification criteria are not met.

##### **tert-butyl methyl ether:**

Species : Rabbit  
Method : OECD Test Guideline 405  
Remarks : Slightly irritating to the eye.  
Based on available data, the classification criteria are not met.

##### **Ethanol:**

Species : Rabbit  
Method : Test(s) equivalent or similar to OECD Test Guideline 405  
Result : Irritating to eyes.  
Remarks : Based on data from similar materials

##### **Methanol:**

Species : Rabbit  
Method : Acceptable non-standard method.  
Remarks : Based on available data, the classification criteria are not met.

#### Components:

##### **Xylene, mixed isomers:**

Species : Rabbit  
Method : Acceptable non-standard method.  
Remarks : Causes serious eye irritation.

##### **Toluene:**

Species : Rabbit

- Effects on fertility :  
Remarks: Contains Toluene, CAS # 108-88-3., Causes foetotoxicity at doses which are maternally toxic.  
Remarks: Contains n-Hexane, CAS # 110-54-3., May impair fertility at doses which produce other toxic effects.  
Remarks: Contains Toluene, CAS # 108-88-3., Many case studies involving abuse during pregnancy indicate that toluene can cause birth defects, growth retardation and learning difficulties.  
Remarks: Ethanol, a component of this material, may cause birth defects and/or miscarriages following high oral doses.
- Reproductive toxicity - Assessment : This product does not meet the criteria for classification in categories 1A/1B.

### Components:

#### **Gasoline; Low boiling point naphtha -unspecified:**

- Effects on fertility :  
Remarks: Contains Toluene, CAS # 108-88-3., Causes foetotoxicity at doses which are maternally toxic.  
Remarks: Contains n-Hexane, CAS # 110-54-3., May impair fertility at doses which produce other toxic effects.  
Remarks: Contains Toluene, CAS # 108-88-3., Many case studies involving abuse during pregnancy indicate that toluene can cause birth defects, growth retardation and learning difficulties.  
Remarks: Inhalation of high concentrations of gasoline vapour containing Methyl tertiary butyl ether produced a very low incidence of rare birth defects (ventral midline closure failure) in mice.
- Reproductive toxicity - Assessment : This product does not meet the criteria for classification in categories 1A/1B.

#### **Ethyl tertiary butyl ether:**

- Effects on fertility : Species: Rat  
Sex: male and female  
Application Route: Oral  
Method: Equivalent or similar to OECD Test Guideline 416  
Remarks: Based on available data, the classification criteria

tinued inhalation may result in unconsciousness.

### **Ethyl tertiary butyl ether:**

Exposure routes : Inhalation  
Target Organs : Central nervous system  
Remarks : May cause drowsiness or dizziness.

### **tert-butyl methyl ether:**

Remarks : Based on available data, the classification criteria are not met.  
Slightly irritating to respiratory system.  
Vapours may cause drowsiness and dizziness.

### **Ethanol:**

Remarks : Based on available data, the classification criteria are not met.

### **Methanol:**

Exposure routes : Oral, Inhalation, Dermal  
Target Organs : Central nervous system, optic nerve  
Remarks : Causes damage to organs.  
High concentrations may cause central nervous system depression resulting in headaches, dizziness and nausea; continued inhalation may result in unconsciousness and/or death.  
Visual system: may cause marked impairment of vision or blindness.

### **Components:**

#### **Xylene, mixed isomers:**

Exposure routes : Inhalation  
Target Organs : Respiratory Tract  
Remarks : High concentrations may cause central nervous system depression resulting in headaches, dizziness and nausea; continued inhalation may result in unconsciousness.  
Inhalation of vapours or mists may cause irritation to the respiratory system.  
May cause respiratory irritation.

#### **Toluene:**

Exposure routes : Inhalation  
Target Organs : Central nervous system  
Remarks : May cause drowsiness or dizziness.  
Vapours may cause drowsiness and dizziness.  
Inhalation of vapours or mists may cause irritation to the respiratory system.

### **Ethanol:**

Remarks : Based on available data, the classification criteria are not met.

### **Methanol:**

Remarks : Visual system: may cause decreased color perception.  
Based on available data, the classification criteria are not met.

### **Components:**

#### **Xylene, mixed isomers:**

Exposure routes : Inhalation  
Target Organs : Auditory system  
Remarks : May cause damage to organs or organ systems through prolonged or repeated exposure.  
Harmful: danger of serious damage to health by prolonged exposure through inhalation.  
Solvent abuse and noise interaction in the work environment may cause hearing loss.

#### **Toluene:**

Exposure routes : Inhalation  
Target Organs : Central nervous system  
Remarks : May cause damage to organs or organ systems through prolonged or repeated exposure.  
May cause damage to central nervous system, respiratory system, visual system, and auditory system through prolonged or repeated exposure.  
Effects were seen at high doses only.  
Visual system: may cause decreased color perception.  
These subtle changes have not been found to lead to functional colour vision deficits.  
Auditory system: prolonged and repeated exposures to high concentrations have resulted in hearing loss in rats.  
Solvent abuse and noise interaction in the work environment may cause hearing loss.  
Exposure to very high concentrations of similar materials has been associated with irregular heart rhythms and cardiac arrest.  
Abuse of vapours has been associated with organ damage and death.

#### **n-Hexane:**

Remarks : Central nervous system: repeated exposure affects the nervous system.  
Peripheral nervous system: causes peripheral neuropathy which can be potentiated by ketones.

Kidney: caused kidney effects in male rats which are not considered relevant to humans

### Ethylbenzene:

Remarks : Harmful: danger of serious damage to health by prolonged exposure through inhalation.  
Auditory system: prolonged and repeated exposures to high concentrations have resulted in hearing loss in rats. Solvent abuse and noise interaction in the work environment may cause hearing loss.  
Kidney: can cause kidney damage.  
Liver: can cause liver damage.  
Central nervous system: repeated exposure affects the nervous system.

### Cyclohexane:

Remarks : Based on available data, the classification criteria are not met.

### Cumene:

Remarks : Kidney: caused kidney effects in male rats which are not considered relevant to humans  
Based on available data, the classification criteria are not met.

### Benzene:

Exposure routes : Oral, Inhalation  
Target Organs : hematopoietic system  
Remarks : Causes damage to organs through prolonged or repeated exposure.  
Blood-forming organs: repeated exposure affects the bone marrow.  
Blood: may cause haemolysis of red blood cells and/or anaemia.  
Immune System: animal studies on this material or its components have demonstrated immunotoxicity.  
May cause MDS (Myelodysplastic Syndrome).  
Exposure to very high concentrations of similar materials has been associated with irregular heart rhythms and cardiac arrest.  
Myelodysplastic syndrome (MDS) was observed in individuals exposed to very high levels (50 ppm to 300 ppm range) of benzene over a long period of time in the workplace. The relevance of these results to lower levels of exposure is not known.

### Components:

#### **Xylene, mixed isomers:**

Species : Rat, male and female  
Application Route : Oral  
Method : Test(s) equivalent or similar to OECD Test Guideline 408  
Target Organs : No specific target organs noted  
Remarks : Over exposures of humans to xylene or xylene solvent mixtures produced predominately central nervous system (CNS) effects with less common effects reported to the lung, gastrointestinal tract, liver, kidney and heart.  
Available animal and human results in auditory system provide limited evidence that xylenes may induce decrements in human hearing, and it was unclear if these changes were temporary or permanent.

Species : Rat, male  
Application Route : Inhalation  
Test atmosphere : vapour  
Method : Literature data  
Target Organs : Auditory system

Method: Test(s) equivalent or similar to OECD Guideline 203  
Remarks: Based on available data, the classification criteria are not met.

Toxicity to daphnia and other aquatic invertebrates : LC50 (Ceriodaphnia dubia (water flea)): 5,012 mg/l  
Exposure time: 48 h  
Method: Test(s) equivalent or similar to OECD Guideline 202  
Remarks: Based on available data, the classification criteria are not met.

Toxicity to algae/aquatic plants : EC50 (Chlorella vulgaris (Fresh water algae)): 675 mg/l  
Exposure time: 72 h  
Method: Test(s) equivalent or similar to OECD Test Guideline 201  
Remarks: Based on available data, the classification criteria are not met.

Toxicity to microorganisms : Toxic threshold (Pseudomonas putida): 6,500 mg/l  
Exposure time: 16 h

Toxicity to fish (Chronic toxicity) : NOEC: 245 mg/l  
Exposure time: 30 d  
Method: Based on quantitative structure-activity relationship (QSAR) modelling  
Remarks: NOEC/NOEL/EL10 > 100 mg/l

Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity) : NOEC: 2 mg/l  
Exposure time: 10 d  
Species: Ceriodaphnia dubia (Water flea)  
Method: Test(s) equivalent or similar to OECD Guideline 211  
Remarks: NOEC/NOEL/EL10 > 1.0 - <=10 mg/l

### Methanol:

Toxicity to fish : LC50 (Lepomis macrochirus (Bluegill sunfish)): 15,400 mg/l

# SAFETY DATA SHEET.

- Exposure time: 96 h  
Method: Other guideline method.  
Remarks: Practically non toxic:  
LL/EL/IL50 > 100 mg/l
- Toxicity to daphnia and other aquatic invertebrates : EC50 (Daphnia magna (Water flea)): 18,260 mg/l  
Exposure time: 96 h  
Method: OECD Test Guideline 202  
Remarks: Practically non toxic:  
LL/EL/IL50 > 100 mg/l
- Toxicity to algae/aquatic plants : EC50 (Selenastrum capricornutum (green algae)): 22,000 mg/l  
Exposure time: 96 h  
Method: OECD Test Guideline 201  
Remarks: Practically non toxic:  
LL/EL/IL50 > 100 mg/l
- Toxicity to microorganisms : IC50 (Activated sludge): > 1,000 mg/l  
Exposure time: 3 h  
Method: OECD Test Guideline 209  
Remarks: Practically non toxic:  
LL/EL/IL50 > 100 mg/l
- Toxicity to fish (Chronic toxicity) : NOEC: 7,900 mg/l  
Exposure time: 200 d  
Species: Oryzias latipes (Japanese medaka)  
Method: Other guideline method.  
Remarks: NOEC/NOEL/EL10 > 100 mg/l
- Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity) : NOEC: 208 mg/l  
Exposure time: 21 d  
Species: Daphnia magna (Water flea)  
Method: Based on quantitative structure-activity relationship (QSAR) modelling  
Remarks: NOEC/NOEL/EL10 > 100 mg/l

### Components:

#### **Xylene, mixed isomers:**

- Toxicity to fish : LC50 (Oncorhynchus mykiss (rainbow trout)): 2.6 mg/l  
Exposure time: 96 h  
Method: Information given is based on data obtained from similar substances.  
Remarks: Toxic  
LL/EL/IL50 > 1 <= 10 mg/l
- Toxicity to daphnia and other aquatic invertebrates : EC50 (Daphnia magna (Water flea)): 3.82 mg/l  
Exposure time: 48 h

### 12.2 Persistence and degradability

#### Product:

Biodegradability : Remarks: Major constituents are inherently biodegradable.  
The volatile constituents will oxidize rapidly by photochemical reactions in air.  
Not Persistent per IMO criteria.  
International Oil Pollution Compensation (IOPC) Fund definition:  
"A non-persistent oil is oil, which, at the time of shipment, consists of hydrocarbon fractions, (a) at least 50% of which, by volume, distills at a temperature of 340°C (645°F) and (b) at least 95% of which, by volume, distils at a temperature of 370°C (700°F) when tested by the ASTM Method D-86/78 or any subsequent revision thereof."  
  
Remarks: While biodegradation of Methyl tertiary butyl ether has been documented, it is generally less biodegradable than many petroleum hydrocarbons and has a potential to migrate relatively longer distances in groundwater.

#### Components:

##### **Gasoline; Low boiling point naphtha -unspecified:**

Biodegradability : Remarks: The volatile constituents will oxidize rapidly by photochemical reactions in air.  
Major constituents are inherently biodegradable, but contains components that may persist in the environment.  
Based on available data, the classification criteria are not met.  
Not Persistent per IMO criteria.  
International Oil Pollution Compensation (IOPC) Fund definition:  
"A non-persistent oil is oil, which, at the time of shipment, consists of hydrocarbon fractions, (a) at least 50% of which, by volume,

distills at a temperature of 340°C (645°F) and (b) at least 95% of which, by volume, distils at a temperature of 370°C (700°F) when tested by the ASTM Method D-86/78 or any subsequent revision thereof."

### **Ethyl tertiary butyl ether:**

Biodegradability : Biodegradation: 6.6 %  
Exposure time: 7 d  
Method: Test(s) equivalent or similar to OECD Guideline 301D  
Remarks: Not readily biodegradable.

### **tert-butyl methyl ether:**

Biodegradability : Biodegradation: 9.24 %  
Exposure time: 28 d  
Method: OECD Test Guideline 301D  
Remarks: Not readily biodegradable.

### **Ethanol:**

Biodegradability : Biodegradation: 84 %  
Exposure time: 20 d  
Method: Test(s) equivalent or similar to OECD Guideline 301 B  
Remarks: Readily biodegradable.  
Oxidises rapidly by photo-chemical reactions in air.

### **Methanol:**

Biodegradability : Biodegradation: 82.7 %  
Exposure time: 5 d  
Method: Other guideline method.  
Remarks: Readily biodegradable.  
Oxidises rapidly by photo-chemical reactions in air.

### **Components:**

#### **Xylene, mixed isomers:**

Biodegradability : Biodegradation: 87.8 %  
Exposure time: 28 d  
Method: Information given is based on data obtained from similar substances.  
Remarks: Readily biodegradable.

#### **Toluene:**

thereof."

### 12.3 Bioaccumulative potential

#### **Product:**

Bioaccumulation : Remarks: Contains constituents with the potential to bioaccumulate.

#### **Components:**

##### **Gasoline; Low boiling point naphtha -unspecified:**

Bioaccumulation : Remarks: Contains constituents with the potential to bioaccumulate.

##### **Ethyl tertiary butyl ether:**

Bioaccumulation : Remarks: Does not bioaccumulate significantly.

##### **tert-butyl methyl ether:**

Bioaccumulation : Species: Cyprinus carpio (Carp)  
Exposure time: 28 d  
Bioconcentration factor (BCF): 1.5  
Method: Test(s) equivalent or similar to OECD Test Guideline 305  
Remarks: Does not bioaccumulate significantly.

##### **Ethanol:**

Bioaccumulation : Remarks: Does not bioaccumulate significantly.

Partition coefficient: n-octanol/water

: log Pow: < 1

##### **Methanol:**

Bioaccumulation : Species: Cyprinus carpio (Carp)  
Exposure time: 72 h  
Bioconcentration factor (BCF): 1  
Method: Test(s) equivalent or similar to OECD Test Guideline 305  
Remarks: Does not bioaccumulate significantly.

#### **Components:**

##### **Xylene, mixed isomers:**

Bioaccumulation : Species: Oncorhynchus mykiss (rainbow trout)  
Exposure time: 56 d  
Bioconcentration factor (BCF): 29  
Method: Literature data.  
Remarks: Does not bioaccumulate significantly.

Method: Literature data.

**Toluene:**

Bioaccumulation : Remarks: Does not bioaccumulate significantly.

**n-Hexane:**

Bioaccumulation : Remarks: Has the potential to bioaccumulate.

**Ethylbenzene:**

Bioaccumulation : Remarks: Does not bioaccumulate significantly.

**Cyclohexane:**

Bioaccumulation : Remarks: Does not significantly accumulate in organisms.

**Cumene:**

Bioaccumulation : Remarks: Does not bioaccumulate significantly.

**Benzene:**

Bioaccumulation : Species: Leuciscus idus (Golden orfe)  
Exposure time: 3 d  
Bioconcentration factor (BCF): < 10  
Method: Test(s) equivalent or similar to OECD Test Guideline 305  
Remarks: Does not bioaccumulate significantly.

### 12.4 Mobility in soil

**Product:**

Mobility : Remarks: Evaporates within a day from water or soil surfaces., Large volumes may penetrate soil and could contaminate groundwater., Contains volatile components., Floats on water., Toxic to aquatic organisms; may cause long-term adverse effects in the aquatic environment. Ether oxygenates are significantly more water soluble and less biodegradable than benzene, toluene, ethyl benzene and xylenes (BTEX). Consequently ether oxygenates have the potential to migrate relatively longer distances than BTEX in groundwater.

**Components:**

**Gasoline; Low boiling point naphtha -unspecified:**

Mobility : Remarks: Evaporates within a day from water or soil surfaces., Large volumes may penetrate soil and could contaminate

### 12.7 Other adverse effects

#### Product:

Additional ecological information : Films formed on water may affect oxygen transfer and damage organisms.

#### Components:

##### **Gasoline; Low boiling point naphtha -unspecified:**

Additional ecological information : Films formed on water may affect oxygen transfer and damage organisms.

#### Components:

##### **n-Hexane:**

Additional ecological information : Does not have ozone depletion potential.

##### **Ethylbenzene:**

Additional ecological information : In view of the high rate of loss from solution, the product is unlikely to pose a significant hazard to aquatic life.

---

## SECTION 13: Disposal considerations

### 13.1 Waste treatment methods

- Product : Recover or recycle if possible.  
It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations.  
Waste arising from a spillage or tank cleaning should be disposed of in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.  
Do not dispose into the environment, in drains or in water courses.  
Do not dispose of tank water bottoms by allowing them to drain into the ground.  
This will result in soil and groundwater contamination.  
MARPOL - see International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) which provides technical aspects at controlling pollutions from ships.
- Contaminated packaging : Drain container thoroughly.

# SAFETY DATA SHEET.

## Premium Unleaded Gasoline E10

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
Print Date. 23.03.2026

---

After draining, vent in a safe place away from sparks and fire.  
Residues may cause an explosion hazard.  
Do not puncture, cut, or weld uncleaned drums.  
Send to drum recoverer or metal reclaimer.  
Do not pollute the soil, water or environment with the waste container.

Local legislation

Remarks : Local regulations may be more stringent than regional or national requirements and must be complied with.  
Disposal should be in accordance with applicable regional, national, and local laws and regulations.

EU Waste Disposal Code (EWC):  
13 07 02\* petrol.

The number given to waste is associated with the appropriate usage. The user must decide if their particular use results in another waste code being assigned.

Classification of waste is always the responsibility of the end user.

Hazardous Waste (England and Wales) Regulations 2005.

## SECTION 15: Regulatory information

### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
Print Date. 23.03.2026

REACH - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles (Annex XVII)

: Conditions of restriction for the following entries should be considered: Gasoline; Low boiling point naphtha-unspecified (Number on list 29, 28) Toluene (Number on list 48) Methanol (Number on list 75, 69) Cyclohexane (Number on list 57) Cumene (Number on list 28) Benzene (Number on list 72, 5, 29, 28)

Seveso III: Directive 2012/18/EU of the European Parliament and of the Council on the control of major-accident hazards involving dangerous substances.      34a

Petroleum products: (a) gasolines and naphthas, (b) kerosenes (including jet fuels), (c) gas oils (including diesel fuels, home heating oils and gas oil blending streams),(d) heavy fuel oils (e) alternative fuels serving the same purposes and with similar properties as regards flammability and environmental hazards as the products referred to in points (a) to (d)

### Other regulations:

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

Environmental Protection Act 1990 (as amended). Health and Safety at Work etc. Act 1974. Consumers Protection Act 1987. Pollution Prevention and Control Act 1999. Environment Act 1995. Factories Act 1961. The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment (Amendment) Regulations 2011. Chemicals (Hazard Information and Packaging for Supply) Regulations 2009. Control of Substances Hazardous to Health Regulations 2002 (as amended). Merchant Shipping (Dangerous Goods and Marine Pollutants) Regulations 1997. Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1995 (as amended). Personal Protective Equipment Regulations 2002. Personal Protective Equipment at Work Regulations 1992. Hazardous Waste (England and Wales) Regulations 2005(as amended). Control of Major Accident Hazards Regulations 1999 (as amended). Renewable Transport Fuel Obligations Order 2007 (as amended). Energy Act 2011. Environmental Permitting (England and Wales) Regulations 2010 (as amended). Waste (England and Wales) Regulations 2011 (as amended). Planning (Hazardous Substances) Act 1990 and associated regulations. The Environmental Protection (Controls on Ozone-Depleting Substances) Regulations 2011.

Product is subject to the Control of Major Accident Hazards Regulations 2015 (2015 No. 483) based on Seveso III directive (2012/18/EU).

### 15.2 Chemical safety assessment.

A Chemical Safety Assessment was performed for all substances of this product.

### Exposure Scenario - Worker

<b>300000000006</b>	
<b>SECTION 1</b>	<b>EXPOSURE SCENARIO TITLE</b>
<b>Title</b>	Manufacture of substance- Industrial
<b>Use Descriptor</b>	<b>Sector of Use:</b> SU 3, SU8, SU9 <b>Process Categories:</b> PROC 1, PROC 2, PROC 3, PROC 8a, PROC 8b, PROC 15 <b>Environmental Release Categories:</b> ERC1, ERC4, ESVOC SpERC 1.1.v1
<b>Scope of process</b>	Loading (including marine vessel/barge, rail/road car and IBC loading) and repacking (including drums and small packs) of substance, including its sampling, storage, unloading distribution and associated laboratory activities.

<b>SECTION 2</b>	<b>OPERATIONAL CONDITIONS AND RISK MANAGEMENT MEASURES</b>	
<b>Section 2.1</b>	<b>Control of Worker Exposure</b>	
<b>Product Characteristics</b>		
Physical form of product	Liquid, vapour pressure > 10 kPa at STP	
Concentration of the Substance in Mixture/Article	Covers use of substance/product up to 100% (unless stated differently).,	
<b>Frequency and Duration of Use</b>		
Covers daily exposures up to 8 hours (unless stated differently).		
<b>Other Operational Conditions affecting Exposure</b>		
Operation is carried out at elevated temperature (> 20°C above ambient temperature). Assumes a good basic standard of occupational hygiene is implemented.		
<b>Contributing Scenarios</b>	<b>Risk Management Measures</b>	
General measures (skin irritants).	Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.	
General measures (carcinogens).	Consider technical advances and process upgrades (including automation) for the elimination of releases. Minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean/flush equipment, where possible, prior to maintenance. Where there is potential for exposure: restrict	

# SAFETY DATA SHEET.

## Premium Unleaded Gasoline E10

Version  
6.3

Revision Date.:  
13.03.2026

SDS Number:  
800010045615

Date of last issue: 05.09.2025  
Print Date. 23.03.2026

	access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenarios; clear up spills immediately and maintain all control measures. Consider the need for risk based health surveillance.
General exposures (closed systems)with sample collection	Handle substance within a closed system. Sample via a closed loop or other system to avoid exposure Wear suitable gloves tested to EN374.
General exposures (closed systems)Continuous process	Handle substance within a closed system.
General exposures (closed systems)Batch process	Handle substance within a closed system. Ensure operation is undertaken outdoors.
Laboratory activities	Handle within a fume cupboard or implement suitable equivalent methods to minimise exposure.
Bulk transfers	Ensure material transfers are under containment or extract ventilation.
Equipment cleaning and maintenance	Drain down and flush system prior to equipment opening or maintenance. Retain drain downs in sealed storage pending disposal or for subsequent recycle. Clear spills immediately. Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training.
Storage.	Ensure operation is undertaken outdoors. Store substance within a closed system.
<b>Section 2.2</b>	<b>Control of Environmental Exposure</b>
Substance is complex UVCB.	
Predominantly hydrophobic.	
<b>Amounts Used</b>	
Fraction of EU tonnage used in region:	0.1
Regional use tonnage (tonnes/year):	1.87E+07
Fraction of Regional tonnage used locally:	0.03
Annual site tonnage (tonnes/year):	6.0E+05
Maximum daily site tonnage (kg/day):	2.0E+06
<b>Frequency and Duration of Use</b>	
Continuous release.	
Emission Days (days/year):	300
<b>Environmental factors not influenced by risk management</b>	

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
 Print Date. 23.03.2026

Local freshwater dilution factor:	10
Local marine water dilution factor:	100
<b>Other Operational Conditions affecting Environmental Exposure</b>	
Release fraction to air from process (initial release prior to RMM):	5.0E-02
Release fraction to wastewater from process (initial release prior to RMM):	3.0E-03
Release fraction to soil from process (initial release prior to RMM):	1.0E-04
<b>Technical conditions and measures at process level (source) to prevent release</b>	
Common practices vary across sites thus conservative process re-lease estimates used.	
<b>Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil</b>	
Prevent discharge of undissolved substance to or recover from onsite wastewater.	
Risk from environmental exposure is driven by humans via indirect exposure (primarily inhalation).	
Onsite waste water treatment required.	
Treat air emission to provide a typical removal efficiency of (%)	99.0
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of >= (%)	99.1
If discharging to domestic sewage treatment plant, no secondary wastewater treatment required.	80.4
<b>Organisational measures to prevent/limit release from site</b>	
Do not apply industrial sludge to natural soils.	
Sludge should be incinerated, contained or reclaimed.	
<b>Conditions and Measures related to municipal sewage treatment plant</b>	
Estimated substance removal from wastewater via domestic sewage treatment (%)	95.5
Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%)	99.1
Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/d)	2.0E+06
Assumed domestic sewage treatment plant flow (m3/d)	10,000
<b>Conditions and Measures related to external treatment of waste for disposal</b>	
During manufacturing no waste of the substance is generated.	
<b>Conditions and measures related to external recovery of waste</b>	
During manufacturing no waste of the substance is generated.	

<b>SECTION 3</b>	<b>EXPOSURE ESTIMATION</b>
<b>Section 3.1 - Health</b>	
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.	

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
Print Date. 23.03.2026

### Section 3.2 -Environment

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

### SECTION 4

### GUIDANCE TO CHECK COMPLIANCE WITH THE EXPOSURE SCENARIO

#### Section 4.1 - Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.  
Available hazard data do not enable the derivation of a DNEL for dermal irritant effects.  
Available hazard data do not enable the derivation of a DNEL for carcinogenic effects.  
Risk Management Measures are based on qualitative risk characterisation.  
Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

#### Section 4.2 -Environment

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org>).

Release fraction to air from process (initial release prior to RMM):	2.5E-02
Release fraction to wastewater from process (initial release prior to RMM):	3.0E-03
Release fraction to soil from process (initial release prior to RMM):	1.0E-03
<b>Technical conditions and measures at process level (source) to prevent release</b>	
Common practices vary across sites thus conservative process re-lease estimates used.	
<b>Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil</b>	
Prevent discharge of undissolved substance to or recover from onsite wastewater.	
Risk from environmental exposure is driven by freshwater sediment.	
If discharging to domestic sewage treatment plant, no secondary wastewater treatment required.	
Treat air emission to provide a typical removal efficiency of (%)	80
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of >= (%)	92.9
If discharging to domestic sewage treatment plant, no secondary wastewater treatment required.	0
<b>Organisational measures to prevent/limit release from site</b>	
Do not apply industrial sludge to natural soils.	
Sludge should be incinerated, contained or reclaimed.	
<b>Conditions and Measures related to municipal sewage treatment plant</b>	
Estimated substance removal from wastewater via domestic sewage treatment (%)	95.5
Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%)	95.5
Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/d)	7.8E+04
Assumed domestic sewage treatment plant flow (m3/d)	2,000
<b>Conditions and Measures related to external treatment of waste for disposal</b>	
This substance is consumed during use and no waste of substance is generated.	
<b>Conditions and measures related to external recovery of waste</b>	
This substance is consumed during use and no waste of substance is generated.	

<b>SECTION 3</b>	<b>EXPOSURE ESTIMATION</b>
<b>Section 3.1 - Health</b>	
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.	

<b>Section 3.2 -Environment</b>
---------------------------------

# SAFETY DATA SHEET.

According to EC No 1907/2006 as amended as at the date of this SDS

## Premium Unleaded Gasoline E10

Version  
6.3

Revision Date.:  
13.03.2026

SDS Number:  
800010045615

Date of last issue: 05.09.2025  
Print Date. 23.03.2026

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

### SECTION 4

### GUIDANCE TO CHECK COMPLIANCE WITH THE EXPOSURE SCENARIO

#### Section 4.1 - Health

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented.  
Available hazard data do not enable the derivation of a DNEL for dermal irritant effects.  
Available hazard data do not enable the derivation of a DNEL for carcinogenic effects.  
Risk Management Measures are based on qualitative risk characterisation.  
Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

#### Section 4.2 -Environment

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org>).

<b>SECTION 1</b>	<b>EXPOSURE SCENARIO TITLE</b>
<b>Title</b>	Use as a fuel- Professional
<b>Use Descriptor</b>	<b>Sector of Use:</b> SU 22 <b>Process Categories:</b> PROC 1, PROC 2, PROC 3, PROC 8a, PROC 8b, PROC 16 <b>Environmental Release Categories:</b> ERC9a, ERC9b, ESVOC SpERC 9.12b.v1
<b>Scope of process</b>	Covers the use as a fuel (or fuel additives and additive components) within closed or contained systems, including incidental exposures during activities associated with its transfer, use, equipment maintenance and handling of waste.

<b>SECTION 2</b>	<b>OPERATIONAL CONDITIONS AND RISK MANAGEMENT MEASURES</b>	
<b>Section 2.1</b>	<b>Control of Worker Exposure</b>	
<b>Product Characteristics</b>		
Physical form of product	Liquid, vapour pressure > 10 kPa at STP	
Concentration of the Substance in Mixture/Article	Covers use of substance/product up to 100% (unless stated differently).,	
<b>Frequency and Duration of Use</b>		
Covers daily exposures up to 8 hours (unless stated differently).		
<b>Other Operational Conditions affecting Exposure</b>		
Assumes use at not more than 20°C above ambient temperature (unless stated differently). Assumes a good basic standard of occupational hygiene is implemented.		
<b>Contributing Scenarios</b>	<b>Risk Management Measures</b>	
General measures (skin irritants).	Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.	
General measures (carcinogens).	Consider technical advances and process upgrades (including automation) for the elimination of releases. Minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean/flush equipment, where possible, prior to maintenance. Where there is potential for exposure: restrict

	access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenarios; clear up spills immediately and maintain all control measures. Consider the need for risk based health surveillance.
General exposures (closed systems)Outdoor	Handle substance within a closed system.
Bulk closed unloading.	Ensure material transfers are under containment or extract ventilation.
Drum/batch transfers	Ensure material transfers are under containment or extract ventilation.
Refueling.	Ensure material transfers are under containment or extract ventilation.
Use as a fuel(closed systems)	Handle substance within a closed system.
Equipment maintenance	Drain down system prior to equipment opening or maintenance. Retain drain downs in sealed storage pending disposal or for subsequent recycle. Clear spills immediately. Provide a good standard of general ventilation. Natural ventilation is from doors, windows etc. Controlled ventilation means air is supplied or removed by a powered fan. Ensure operatives are trained to minimise exposures.
Storage.	Store substance within a closed system. Provide a good standard of general ventilation. Natural ventilation is from doors, windows etc. Controlled ventilation means air is supplied or removed by a powered fan.
<b>Section 2.2</b>	<b>Control of Environmental Exposure</b>
Substance is complex UVCB.	
Predominantly hydrophobic.	
<b>Amounts Used</b>	
Fraction of EU tonnage used in region:	0.1
Regional use tonnage (tonnes/year):	1.19E+06
Fraction of Regional tonnage used locally:	5.0E-04
Annual site tonnage (tonnes/year):	5.9E+02
Maximum daily site tonnage (kg/day):	1.6E+03
<b>Frequency and Duration of Use</b>	
Continuous release.	
Emission Days (days/year):	365

Version 6.3      Revision Date.: 13.03.2026      SDS Number: 800010045615      Date of last issue: 05.09.2025  
Print Date. 23.03.2026

<b>Environmental factors not influenced by risk management</b>	
Local freshwater dilution factor:	10
Local marine water dilution factor:	100
<b>Other Operational Conditions affecting Environmental Exposure</b>	
Release fraction to air from process (initial release prior to RMM):	1.0E-02
Release fraction to wastewater from process (initial release prior to RMM):	1.0E-05
Release fraction to soil from process (initial release prior to RMM):	1.0E-05
<b>Technical conditions and measures at process level (source) to prevent release</b>	
Common practices vary across sites thus conservative process re-release estimates used.	
<b>Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil</b>	
Risk from environmental exposure is driven by humans via indirect exposure (primarily inhalation).	
If discharging to domestic sewage treatment plant, no secondary wastewater treatment required.	
Treat air emission to provide a typical removal efficiency of (%)	0
Treat onsite wastewater (prior to receiving water discharge) to provide the required removal efficiency of >= (%)	3.4
If discharging to domestic sewage treatment plant, no secondary wastewater treatment required.	
<b>Organisational measures to prevent/limit release from site</b>	
Do not apply industrial sludge to natural soils.	
Sludge should be incinerated, contained or reclaimed.	
<b>Conditions and Measures related to municipal sewage treatment plant</b>	
Estimated substance removal from wastewater via domestic sewage treatment (%)	95.5
Total efficiency of removal from wastewater after onsite and offsite (domestic treatment plant) RMMs (%)	95.5
Maximum allowable site tonnage (MSafe) based on release following total wastewater treatment removal (kg/d)	1.5E+04
Assumed domestic sewage treatment plant flow (m3/d)	2,000
<b>Conditions and Measures related to external treatment of waste for disposal</b>	
Combustion emissions limited by required exhaust emission controls.	
Waste combustion emissions considered in regional exposure assessment.	
<b>Conditions and measures related to external recovery of waste</b>	
This substance is consumed during use and no waste of substance is generated.	

<b>SECTION 3</b>	<b>EXPOSURE ESTIMATION</b>
<b>Section 3.1 - Health</b>	
The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

---

--

<b>Section 3.2 -Environment</b>
---------------------------------

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.
--

<b>SECTION 4</b>
------------------

<b>GUIDANCE TO CHECK COMPLIANCE WITH THE EXPOSURE SCENARIO</b>
--

<b>Section 4.1 - Health</b>
-----------------------------

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in Section 2 are implemented. Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. Available hazard data do not enable the derivation of a DNEL for carcinogenic effects. Risk Management Measures are based on qualitative risk characterisation. Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.
--

<b>Section 4.2 -Environment</b>
---------------------------------

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.
--

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.
---

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.
---

Further details on scaling and control technologies are provided in SpERC factsheet ( <a href="http://cefic.org">http://cefic.org</a> ).
--

### Exposure Scenario - Consumer

<b>30000000208</b>	
<b>SECTION 1</b>	<b>EXPOSURE SCENARIO TITLE</b>
<b>Title</b>	Use as a fuel - Consumer
<b>Use Descriptor</b>	<b>Sector of Use:</b> SU21 <b>Product Categories:</b> PC13 <b>Environmental Release Categories:</b> ERC9a, ERC9b, ESVOC SpERC 9.12c.v1
<b>Scope of process</b>	Covers consumer uses of automotive fuels only.

<b>SECTION 2</b>	<b>OPERATIONAL CONDITIONS AND RISK MANAGEMENT MEASURES</b>
<b>Section 2.1</b>	<b>Control of Consumer Exposure</b>
<b>Product Characteristics</b>	
Physical form of product	Liquid, vapour pressure > 10 Pa
Concentration of the Substance in Mixture/Article	Unless stated otherwise.
	Covers concentration up to (%): 100 %
<b>Amounts Used</b>	
Unless stated otherwise.	
for each use event, covers amount up to (g):	37,500
covers skin contact area (cm <sup>2</sup> ):	420
<b>Frequency and Duration of Use</b>	
Unless stated otherwise.	
covers use up to (times/day of use):	0.143
Exposure (hours/event):	2
<b>Other Operational Conditions affecting Exposure</b>	
Unless stated otherwise.	
Covers use at ambient temperatures.	
Covers use in room size of 20m <sup>3</sup>	
Covers use under typical household ventilation.	
<b>Product Categories</b>	<b>OPERATIONAL CONDITIONS AND RISK MANAGEMENT MEASURES</b>
Fuels Liquid: Automotive Refuelling.	Covers concentrations up to 100 %
	covers use up to 52 day/year
	covers use up to 1 times/day of use
	covers skin contact area up to (cm <sup>2</sup> ): 210.00 cm <sup>2</sup>
